

EngineeRD

CAPABILITY STATEMENT

COMPANY OVERVIEW

Our team is comprised of researchers, engineers, problem solvers, and science enthusiasts from diverse skills and personal backgrounds. This collective strength allows our company to offer diverse services, discover alternative solutions to a wide array of problems, and deliver value to clients faster and more cost efficiently. Our U.S. based testing lab allows us to study and evaluate the latest industry technologies that can continue to improve business capabilities and simplify complexity. Some recent achievements we are proud of during the pandemic response efforts:

- We taught a non-telework ready government agency how to rapidly transform into a 100% virtual office environment during the recent COVID-19 pandemic
- Our service desk improvement team used Microsoft Dynamics 365 and Power Platform to automate congested business processes across a 100-user work environment
- We assisted a defense mission critical project deploy managed telecommunication and computing infrastructure rapidly across the CONUS while staying under budget

EngineeRD's mission is to educate our clients on how to simplify complex systems using meaningful research, thoughtful analysis and purposeful design thinking.

INDUSTRY

Government
Defense
Telecommunication
Healthcare
Education
Professional Services
Retail
COVID-19

COMPETENCIES

Unified Communication
Endpoint Management
Network Engineering
Cyber Compliance
Process Automation
Systems Integration
Business Intelligence
Digital Asset Management

MANAGED SERVICES

Management Consulting
